EDUCATION

University of Southern California, Viterbi School of Engineering - CGPA: 3.65/4.0

Los Angeles, California

Master of Science in Computer Science

August 2025-May 2027

- Courses: Analysis of Algorithms, Web Technologies, Machine Learning, Software Engineering, Database Systems
- Awards: 1st Place (Vercel Category) at GoodVibesOnly Hackathon

BNM Institute of Technology - CGPA: 9.84 / 10

Bengaluru, India

Bachelor of Engineering in Computer Science

November 2021-June 2025

- Courses: Data Structures, Computer Networks, Operating Systems, Database Management Systems
- Awards: Gold Medalist (Rank 1 in Department), Best Project Award (ISL Interpreter) and Merit Scholarship Recipient (5 semesters)
- Leadership: Sponsorship and organization member, TATVA (Annual Fest)

SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: React, Node.js, FastAPI, Flask, Django, Tailwind CSS, Angular

Databases: PostgreSQL, MongoDB, Supabase, PGVector

Cloud & DevOps: AWS, Azure, Docker, GitHub Actions, Linux, CI/CD

Tools & Technologies: Git, Playwright (Automation), Jira, Power BI, Power Automate, REST APIs, JWT Authentication

INTERNSHIP EXPERIENCE

Synamedia Pvt. Ltd

Bengaluru, India

Grad Intern

February 2025-June 2025

- Built a **Python** data pipeline to parse and classify operational data, generating **Power BI** dashboards used for engineering agile decision-making
- Developed an end-to-end testing suite using **Playwright**, **Docker** and **Python** to automate backtrace validation, decreasing bug identification time from **3 hours to under 10 minutes (90% efficiency gain)**

Technodysis Pvt. Ltd

Bengaluru, India

Robotic Process Automation Intern

October 2024-January 2025

- Automated **10+ business processes** by deploying a **Power Automate** solution to process files from Outlook, perform calculations in Excel, and distribute reports, achieving a **95% reduction** in manual effort

PROJECTS

RoleReady | FastAPI, Angular, PostgreSQL, PGVector, Gemini AI, Docker, Supabase | Jan 2026-Apr 2026

- Developed backend APIs for AI-generated summaries and gamified onboarding workflows using **FastAPI** and **PostgreSQL**
- Built semantic retrieval pipelines using **vector embeddings** and **PGVector** to support context-aware AI content generation
- Integrated **Gemini APIs** with **RAG-style workflows** for AI-generated summaries, training assets, and role-specific learning paths
- Developed backend services and **asynchronous workflows** supporting ingestion, semantic search, vector retrieval, and AI-powered training automation

PromptQuest | React, TypeScript, Python, GCP, Gemini AI | Winner, GoodVibesOnly Hackathon | Nov 2025

- Built a gamified prompt engineering platform using React, TypeScript, and **Gemini AI** with **AI-based response evaluation**
- Developed an automated feedback loop to refine vague prompts and generate context-aware AI guidance across **10+ progressive levels**

Event Search | React, Kotlin, Node.js, MongoDB, Jetpack Compose | Sep 2025-Dec 2025

- Built a cross-platform event discovery app using **React**, **Kotlin**, **Node.js**, **Ticketmaster/Spotify APIs**, and **GCP Geocoding**
- Implemented React Query and MongoDB-based persistence to synchronize user favorites across web and Android platforms, achieving a **90% satisfaction** rate across **20+ peer evaluations**
